EDUCATION

- **University of British Columbia** Vancouver, BC
Bachelor of Science September 2017 – May 2021 (Estimated)

EXPERIENCE

- **Sogou Inc.** Beijing, China
Software Engineer Intern May 2017 - July 2017
 - **Speech-Recognition & OCR Proofreading Tools:** Service for internal proofreading and testing of AI-Cloud services; using Bootstrap, Vue.js, Flask and Docker.
 - **Fapiao (Invoice) Recognition Service:** Service for Fapiao (invoice) format and content recognition; using Flask and scikit-image; based on Sogou AI-Cloud OCR API; primarily used for reimbursements of Sogou's financial department.
- **hack.init()** Shanghai, China
Co-Founder, Executive Board Member & Director of Tech Department February 2017 - Present
 - **hack.init() Hackathon 2017:** China's premier youth hackathon; July 8 to 9 at ShanghaiTech University; website at <http://hackinit.io>; press coverage at <https://goo.gl/ZFX3Ni> and at <https://goo.gl/QXx8HM> (Simplified Chinese)
 - **Management:** As co-founder, I negotiated sponsorships from big corporations, including Google, Apple, Sogou and Wolfram, venture capitals and incubators. I also controlled the direction of the event.
 - **Technology:** I built the website of the event, <http://hackinit.io>, including the front-end and the back-end. I am responsible for server maintenance.
- **InitialView** Beijing, China
Software Engineer Intern September 2016 – Present
 - **Web Development:** I worked on the front-end, the back-end and server maintenance with the tech team. I built and maintained the company's homepage, booking system, student portal, admissions portal and video players.
 - **App Development:** I worked on the company's mobile apps on iOS and on Android.

PROJECTS

- **Vox:** A tool that redefines information structure for audio documents, with visualization and vertical search; based on Django; 1st Place at i-Lab Hackathon 2017.
- **GitArt:** A GitHub-like idea-sharing and collaboration platform for artists, based on Django; Best Hack of Innovation at Unique Hackday 2017.
- **Viso:** A coding interview platform with Leap Motion anti-cheating system; based on Flask; 2nd Place at HackNanjing 2017.
- **Aquatopia:** A monitoring, alerting and visualization system for environmental data; based on Django; project at PennApps XV.
- **HackSearch:** A vertical, distributed search engine; based on Golang architecture and D3.js; Top 9 and InnoSpring Award at HACKxFDU 2016.

AWARDS

- **1st Place, Microsoft College Code Competition** September 2017
- **Outstanding International Student Award, University of British Columbia** February 2017
- **Silver Medal, China Team Selection Competition** May 2015
- **Bronze Medal, Asia Pacific Informatics Olympiad** May 2015
